PROFESSIONAL
EXPERIENCE

Web Developer | October 2022 – 2026
SupportZebra – Cagayan de Oro City, Philippines

- Built and shipped production-ready web applications using React, TypeScript, Tailwind CSS, and RTK Query, emphasizing performance, scalability, and maintainability.
- Developed intuitive, responsive, and accessible UI flows across modern browsers and devices.
- Integrated REST APIs with optimized state management, caching, and error handling using RTK Query for smooth data delivery.
- Co-developed a company-wide design system as an NPM package, creating reusable UI components (buttons, navigation, modals) and managing deployment and updates with tsup.
- Translated Figma/UX wireframes into pixel-perfect, production-ready components while collaborating closely with designers and stakeholders.
- Collaborated on a full-stack Applicant Tracking System (ATS) on Bubble.io, focusing on frontend UI, automation, and workflows over five months.
- Fully revamped the ATS using Replit AI, modernizing the frontend architecture, improving UI/UX, and enhancing overall system performance.
- Provided post-launch hypercare support for the ATS, resolving production issues, addressing user feedback, and delivering workflow improvements for a stable rollout.
- Delivered features efficiently by streamlining components, optimizing workflows, and enhancing developer experience.
- Contributed to the CCaaS (Contact Center as a Service) team, developing and maintaining Amazon Connect integrations, workflows, and related application features.

EDUCATION

University of Science and Technology of Southern Philippines | 2018 – 2022
Bachelor of Science in Information Technology

- Dean’s Lister

CERTIFICATES

Hanawilo BootCamp | 2022
Hanawilo Web Development Bootcamp

AWS Certified Cloud Practitioner | Issued: July, 2026 – Expiration: July, 2029
Issued by Amazon Web Services Training and Certification

SKILLS

Frontend:

- HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks/Libraries:

- React.js,

State Management:

- RTK Query, Redux Toolkit

Styling:

- Tailwind CSS, Material UI

Backend:

- Node.js, Express.js, MongoDB

Cloud & Contact Center:

- AWS, Amazon Connect, CCaaS

Mobile Development:

- React Native, Expo

Tools & Platform:

- Git, GitHub, Vite, npm, Figma, Bubble.io, Replit, Claude Code

PERSONAL PROJECTS

Freelance Frontend Developer (Project-Based)

Various Clients | 2023–Present

- Built responsive web applications and mobile experiences using React, TypeScript, Tailwind CSS, and React Native + Expo.
- Designed UI/UX layouts in Figma and converted them into pixel-perfect, reusable components.
- Developed dashboards, landing pages, and business tools with integrated REST APIs, authentication, and state management using RTK Query.
- Optimized performance for smoother user experiences.

Selected Freelance Projects

Health Management System + Patient Mobile App — React, Tailwind, TypeScript, RTK Query, React Native, Expo

- Community clinic platform for scheduling, patient records, and real-time appointment updates with video calls.

Community Youth Management System — React, TypeScript, MUI, RTK Query

- Dashboard for managing youth records, documents, and operations.

Hotel & Booking Management System — React, TypeScript, Tailwind CSS, AI-Assisted Development

- Built a hotel and booking management platform for reservations, room availability, guest records, and operational workflows, using AI-assisted development to accelerate implementation and iteration.

Book Publishing UI/UX Design — Figma

- Wireframes, flows, and responsive components for a publishing platform.
